 • Ride control system  
 • Joystick-steering with travel switch (FNR)

• Proven, reliable, fuel efficient, low noise Cummins Tier-III QSL engine  
 • 3 mode engine power selection  
 • Hi-Mate remote management system

### Robert Hazell - Hazell Bros

"We use the Hyundai HL770-9 wheel loader across all our operations. The main advantage for us has been the driver's vision in confined areas. They are also extremely effective as sales loaders in our quarry operations with their traction effort and hydraulic lifting ability."

### Steve Olsson - Olsson Sand and Gravel

"We have had a HL760-9 Hyundai for over 3 years and it has been a great addition to our operation - we'd buy another one in a heartbeat."

### Mick Jennings - Rye Sand and Soil

"Our Hyundai HL760-9 loader supplied by Onetrak has performed extremely well over the past 18 months. The Onetrak team has done a great job supporting it in field. We're very happy with the product and recently added an R60CR-9 mini excavator to our fleet."
